SOFTWARE DEVELOPER

Global explorer turned full stack web developer with a background in technical project management, education and travel. Experience working on diverse teams in both the US and abroad with a proven track record in delivering results and moving projects forward. Passionate about making the world more inclusive and accessible.

TECHNICAL SKILLS

Ruby | Ruby on Rails | Active Record | Sinatra | OOP | SQL | PostgreSQL | JavaScript | React.js | Redux | HTML | CSS

TECHNICAL PROJECTS

TravelTongue - [Github](#)

Backend: Ruby on Rails, Frontend: React, Redux

App for discovering local dishes around the world.

- Developed a Rails API with RESTful endpoints for users, dishes and locations
- Utilized JSON Web Tokens and local storage to store encrypted user information client-side and bcrypt server-side
- Implemented GoogleMaps and World Bank API to render a dynamic world map
- Created pop up modals using pure CSS which allow users to add new dishes seamlessly
- Managed state, props and store in React and Redux for scalability

ArtCollect - [Github](#)

Backend: Ruby on Rails, Frontend: React, Redux

Social Media site for collecting and sharing artwork.

- Developed a Rails API with RESTful endpoints for users, artworks and comments
- Utilized JSON Web Tokens and local storage to store encrypted user information client-side and bcrypt server-side
- Built out full-stack Create, Read, Update and Delete actions to give comprehensive functionality
- Implemented the StackGrid CSS library to create a responsive image gallery
- Managed state, props and store in React and Redux for scalability

Face Smasher - [Github](#)

Backend: Ruby on Rails, Frontend: Vanilla JavaScript

A simple and fun click game where users click falling faces as fast as they can.

- Utilized the p5.play JavaScript library to draw continuously falling sprites on a canvas
- Implemented event listeners on the faces that increase points and on squares that decrease points
- Developed a Rails API with RESTful endpoints for users, scores and levels

EXPERIENCE

Cowen & Company, New York, NY | Recruiting Analyst (Temp) December 2018 - October 2019

- Implemented the onboarding of new applicant tracking system, Greenhouse, cutting administrative time by 40%
- Organized diverse and comprehensive interview schedules for 400+ interviews, resulting in 90+ hires
- Maintained communication with 40+ stakeholders daily to ensure all appointments were kept and meetings attended

Czech Republic, Israel, Malta and South Korea | Freelance International Roles July 2016 - December 2018

- Taught English to 40+ business professionals in companies across Prague, Czech Republic and Malta
- Equipped North Korean defectors with the tools to share their stories through public speaking and ESL coaching
- Enhanced travel experiences at the largest hostel in Tel Aviv, Israel, supporting stay and event logistics for 100+ guests daily

LinkedIn, San Francisco, CA | Technical Project Manager May 2015 - July 2016

- Supported data engineers in successfully ingesting tens of millions of data records to be published on LinkedIn Company Pages
- Led 30 data assurance analysts in Bangalore and Manila to validate quality of data samples and hit weekly targets
- Implemented crowdsourced QA testing, saving \$200k+ by eliminating the need for offshore analysts
- Streamlined project deliverables using Agile Scrum, enabling the team to hit deadlines and business goals
- Analyzed sample quality and determined data to be purchased by collaborating with internal and external stakeholders
- Recognized by Q2 RESULTS award for increasing ingestion efficiency and decreasing data assurance costs

EDUCATION

Flatiron School, New York, NY | Full Stack Immersive Web Development Program February 2020

University of San Francisco, San Francisco, CA | Bachelor of Science in Business, Entrepreneurship & Innovation May 2015
